

Burt County

Each Nebraska county with sufficient data is represented by a dot, placed on a continuum from least health to healthiest in the nation.

The color of each dot represents data-informed groupings of counties nationwide with similar **Population Health and Well-being** or **Community Conditions** on the continuum.

Population Health and Well-being: Burt County is faring worse than the average county in Nebraska and slightly better than the average county in the nation.

Community Conditions: Burt County is faring about the same as the average county in Nebraska and better than the average county in the nation.

Population: 6,727	2025	Low NE 2025	High NE 2025	NE 2025	U.S. 2025
Population Health and Well-being					
Length of Life					
Premature death (years of potential life lost, per 100,000) ⁽¹⁾	12044	4802	27000	7100	8400
Quality of Life

Childcare cost (as % of median houshold income, two children) ^(1,2)	29	23	44	30	28

Burt County

The County Health Rankings & Roadmaps data release provides a snapshot of the health of each county in two summary scores: **Population Health and Well-being** (which measures length and quality of life) and **Community Conditions** (which measure issues that can shape population health and well-being). Each county is placed on a continuum from least healthy to healthiest in the nation and is categorized into a health grouping of counties with similar summary scores. The following tables illustrate the “drivers” for the health of this county.

What do these drivers mean?

The drivers indicate the measures with the greatest impact on the health of the county, according to the CHR&R model of health and county performance. Drivers labeled with a green plus sign are measures where the county performed better than the average of counties nationwide. Drivers labeled with a red minus sign could be improved and may warrant additional attention. The Direction of Impact is not determined for counties with insufficient data.

Population Health and Well-being

Drivers with the greatest impact on health, Burt County, Nebraska, 2025

Measure	Description	Factor Category	County Value	U.S. 2025	Direction of Impact
Poor Mental Health Days	Average number of mentally unhealthy days reported in past 30 days (age-adjusted)	Quality of Life	4.8	5.1	+
Poor Physical Health Days	Average number of physically unhealthy days reported in past 30 days (age-adjusted)	Quality of Life	3.8	3.9	+
Poor or Fair Health	Percentage of adults reporting fair or poor health (age-adjusted)	Quality of Life	15%	17%	+
Premature Death	Years of potential life lost before age 75 per 100,000 population (age-adjusted)	Length of Life	12044	8400	-
Low Birth Weight	Percentage of live births with low birth weight (<2,500 grams)	Quality of Life	8%	8.4%	-

Community Conditions

Drivers with the greatest impact on health, Burt County, Nebraska, 2025

Measure	Description	Factor Category	County Value	U.S. 2025	Direction of Impact
Mammography Screening	Percentage of female Medicare enrollees ages 65–74 who received an annual mammography screening	Health Infrastructure	57%	44%	+
Preventable Hospital Stays	Rate of hospital stays for ambulatory-care sensitive conditions per 100,000 Medicare enrollees	Health Infrastructure	1409	2666	+
Flu Vaccinations	Percentage of fee-for-service (FFS) Medicare enrollees who had an annual flu vaccination	Health Infrastructure	31%	48%	-
Severe Housing Problems	Percentage of households with at least 1 of 4 housing problems: overcrowding, high housing costs, lack of kitchen facilities, or lack of plumbing facilities	Physical Environment	9%	17%	+
Unemployment	Percentage of population ages 16 and older unemployed but seeking work	Social and Economic Factors	2.5%	3.6%	+

N/A: Not applicable due to insufficient data

➤ Green Plus: County performed better than the average of counties in the U.S.

➤ Red Minus: County performed worse than the average of counties in the U.S.
